1940's/50's Fidez Risendez Imperial 410 Basemitt

Mexican made Professional mitt with lots of stampings. Original rolled laced web and great logo stampings. Very high quality.....\$50

I have been collecting international gloves for years. Came across one from England, a few from Australia, too many from Canada but just a handful from Mexico. Living in Southern California my whole life, I thought I would've come across more gloves made in Mexico. Although hard to date exactly, most seem to have been made from 50's patterns but it's hard to tell. They could be later. Every one of them is very sturdy and made of the highest quality. In fact, some borderline on stiff, which leads me to believe the hides were steerhide or they were tanned differently. In any regard, they are high quality and pretty hard to come by. This represents the majority of my Mexican gloves. I have a few splitfingers I just can't seem to part with just yet. \$295 takes all of them.

1894 Folk Art Mitt

A unique 1894 homemade catchers mitt with really interesting construction. This is a rare example of 19th century ingenuity and craftsmanship coupled with some of the innovations of the day happening to catchers mitts. It is completely hand sewn and features a thick leather "Decker" style finger guard and elaborate webbing system. It is not a big mitt and measures 8 5/8" tall & 9 1/2" wide. An adult hand fits in but very snugly. There has been some repairs over the years but the mitt was made very sturdy and is still remarkably intact.....\$295
